**Connect Energy. It's what we do.**

Connect Energy is an electrical design and installation company, focusing on Solar Power and Battery storage systems for retail and commercial customers.

Our primary focus and core skill set is in the delivery of quality solar power and battery storage installations, working alongside reputable industry partners.

We also design, procure and install turn key solar and battery energy solutions direct to residential and commercial customers.

SOLAR. BATTERIES. ELECTRICAL. SERVICE.

Connect Energy. It's what we do.

At Connect Energy, we are all about connections – and not only the electrical connections of the components we work with.

We seek to establish and nurture strong connections with our clients, our staff, our business partners, our community and our environment.

We believe that through strong connections we can make good things great .

Will you connect with us and join in?

With almost a decade of experience in the Solar Industry, you can be assured that your system will be designed, installed and maintained to the highest of standards.

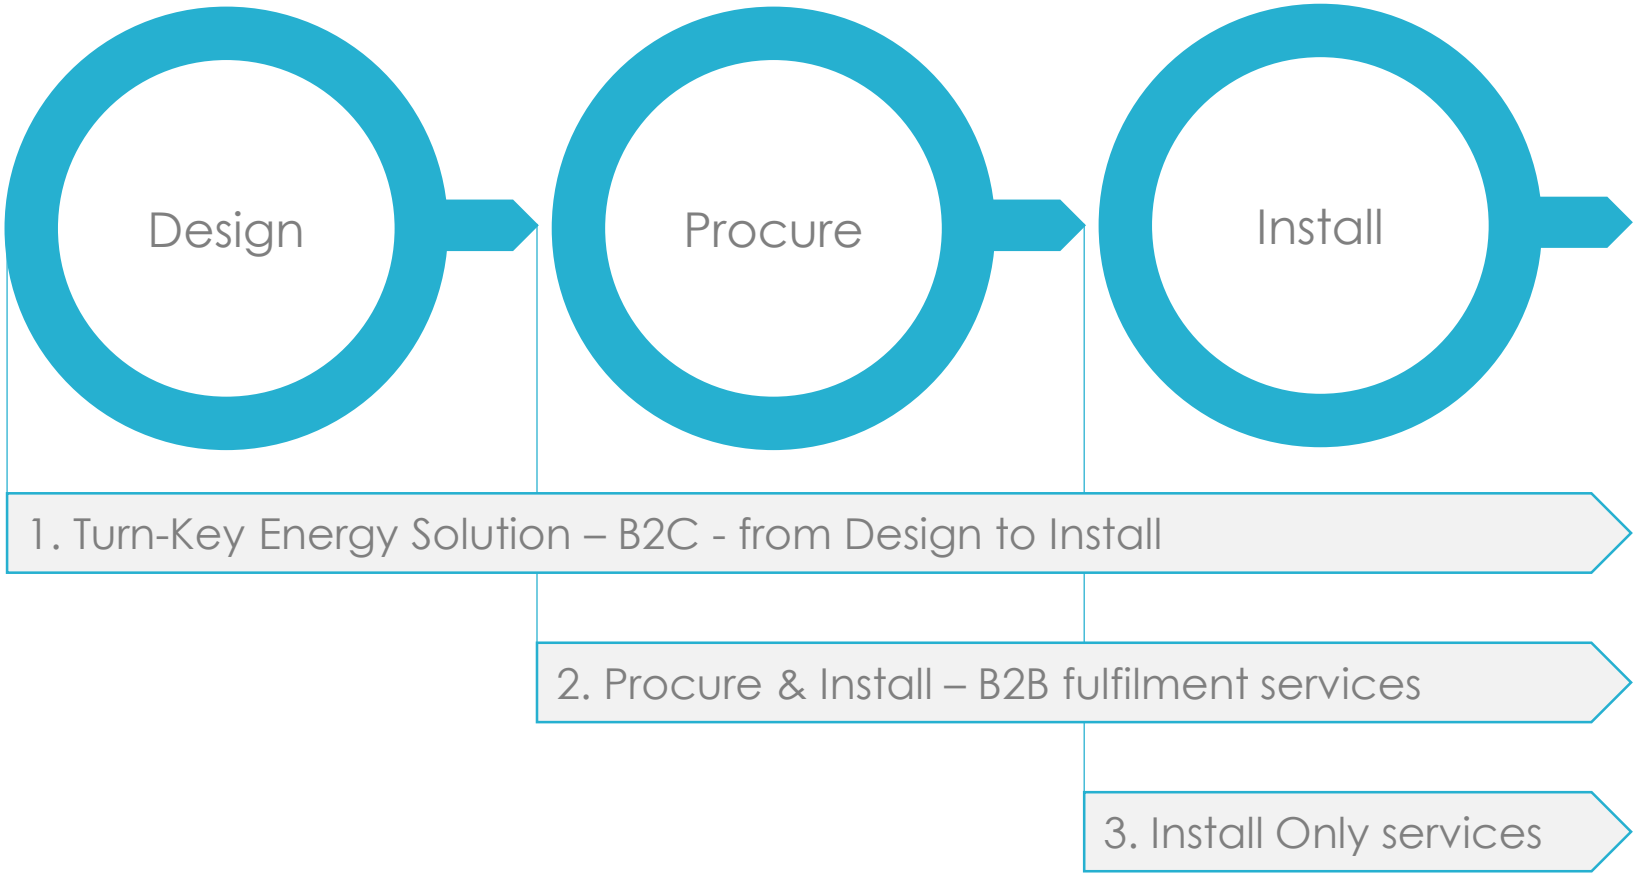

We are Licenced Electrical Contractors, hold Clean Energy Council Accreditation for Grid Connected and Off Grid Solar & Battery power systems, and all our installations are carried out by licensed and experienced Solar PV and Battery Electricians and Technicians.

We recommend only a small range of carefully selected products, to ensure optimum performance, hassle-free ownership and the strongest return on investment over time.

Connect Energy. It's what we do.

## How We Deliver Value

## Connect Energy Installer Alliance

Why compete – let's Connect

### Advantages for Retail Sellers -

- One point of contact and accountability
- Access a larger pool of install skillsets and regions
- Continuity in quality, cost and service levels
- Scale up, down or sideways without internal effort
- Bid for jobs where you need extra experience to deliver

### Advantages for Installers -

- Access a larger pool of installation work
- Align with like minded installation companies
- Bid for jobs where you need extra capacity to install
- Keep overheads low - capacity without cost
- Contract out your in house staff in quiet periods
